What was the best aspect of the course?

Att få möjlighet att leka med olika verktyg och simpla koncept för att få en känning för teorin.

Radiation is such a central subject in atmospheric sciences. I feel like I understand much more when I read about atmospheric science now thanks to the course.

The lectures

Jag tycker att labben var intressant, även om labinstruktionen inte var så utförlig i detaljerna.

2. What improvements would you suggest in the course?

What improvements would you suggest in the course?

Det vi gick igenom på föreläsningarna stämde inte helt överens med det vi skulle läsa, tkr heller inte att Wallace & Hobbs hade ett bra kapitel om strålning.

Lectures could have a better structure, teaching was interesting and lectures were interesting but some times too much time went to changing teaching technics.

Many of the calculation exercises felt a bit off-topic (I guess it's because the course has been remade) and/or felt too hard compared to what was taught in the lectures.

I would have liked a copy of answers to the exercises.

Perhaps some more hints during the course on what's important

Jag skulle vilja att föreläsningarna innehöll mer teoretiska grunder som passar ihop med de räkneövningar som gavs i kursen. För mig kommer förståelsen genom teori och räkneövningar.

3. What advice would you like to give to future course participants?

What advice would you like to give to future course participants?

Läs i boken och lyssna på Bodil.

Attend the exercises, because you will not be given answers to the exercises.

Read the given chapters in the book before each lecture

Other comments

Jag skulle önska mer utförliga lösningar till räkneuppgifterna som löstes på föreläsningar och övningar. Ibland var det oklarheter eller steg som hoppades över.

Comment on the aims

The lectures were not very focused and felt easy compared to the exam.
Question 2 on the exam was a bit odd. We had never encountered anything similar during the course.
