1. What was the best aspect of the course?

What was the best aspect of the course?

The teacher was really responsive to us, and was always making sure that everybody understands what he is talking about and no one is left behind. He was encouraging us to work on some exercises for ourselves and offered to correct them and give us some feedback. He even sometimes stayed longer after the lecture explaining some additional material.

A close relationship between a mathematical formulation and a physical explanation

2. What improvements would you suggest in the course?

What improvements would you suggest in the course?

There's in my opinion nothing to improve in the course itself but I wished to have more time studying for this course. But because we had the thermodynamics exam at the same time, we couldn't concentrate on fluid dynamics as much as we wanted to.

Nothing

3. What advice would you like to give to future course participants?

What advice would you like to give to future course participants?

Try to do also the home exercises you don't really have to do, and read the book.
