2. What was the best aspect of the course?

What was the best aspect of the course?

It was a great learning experience to be able to create a large experience of my own.

The project work. That you could choose your own topic that interested you.

Projektarbetet

3. What improvements would you suggest?

What improvements would you suggest?

A session for solving and talking about exercises could be had every 2 weeks or so.

When you had trouble with the model, you could only ask Thorsten for help. Since the assistants didn't know anything about the model they couldn't help you. Also, the assistants were not sure what was expected to be included in the report/project so you always had to go to Thorsten. So maybe better communications between the assistants and the lecturer.

I think it would be better if some more moments throughout the course were graded. As it is know, the report is responsible for 100% of your grade and 15hp. I think the oral presentation should be graded aswell. Maybe also include a peer-review process (like previous years) that are part of your grade.

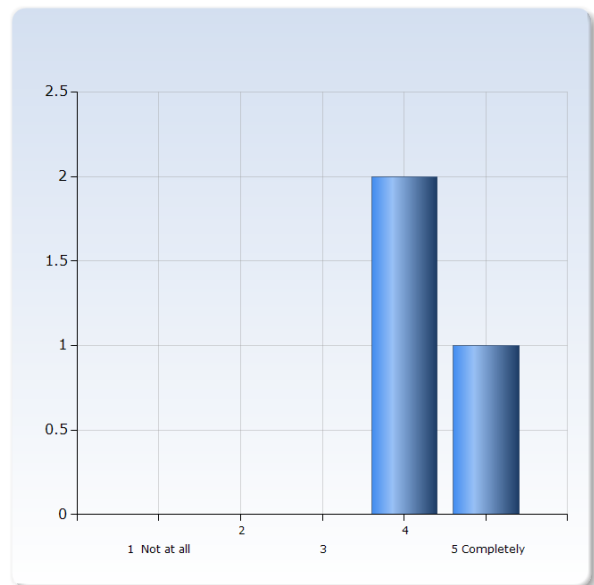

Att faktiskt ha med övningsuppgifterna i examinationen.

Peer-grading när vi läser varandras uppsatser och ger feedback.

The home assignments were removed in the middle of the course. This felt very strange to me since it was said from the start that these were required for a passing grade. I also think they helped with the understanding.

Comments

It was hard to get feedback since you always had to go to Thorsten and despite him always being very nice and willing to help it was clear that he did not always have the time. It would be better if you could go to the assistants with help.

Hade gärna önskat mer återkoppling - gärna genom att läsa varandras uppsatser.
Föredragit att ha samma upplägg som var förra året
