2	1 (33.3%)
3	1 (33.3%)
4	0 (0.0%)
5 Completely	1 (33.3%)
Total	3 (100.0%)

On average, I have spent the following number of hours per week on the course, including self-study

30 hours
30
40

2. What was the best aspect of the course?

What was the best aspect of the course?

The plumes!! The connection of theory to actual phenomenons and situations.

The lectures that were filled with derivations and conclusions based on mathematical relationships. The "normal" lectures were good but not as good.

3. What improvements would you suggest?

What improvements would you suggest?

Improve the laborations, or remake them!! It didn't work well.

So many graphs in the slides, maybe some of them needs more notes on them?

Do not introduce concepts that's not in the lectures on the exam, even if they are an extension of the concepts from the lectures. It is an unnecessary stress to have to apply concepts in ways that are only alluded to in the lectures.

The instructions for the diurnal variability lab was quite hard to follow. Maybe they need some looking over!

The labs could improve some. Both the computer lab and the field measurement lab. the computer lab felt like it was just a copy paste from somewhere else and I didn't feel like there was enough time to get anything out of it. A bit unstructured.

The wind measurement lab failed due to non working equipment. I also felt like the lab assistant (who was excellent) had the labs thrown into her lap with little time to prepare. I think I would have liked a few more assistant led exercises.

I would also have liked a bit more on the oceanic boundary layers (plural ;)).

4. Was the level of the course content adequate?

Was the level of the course content adequate?

Yes!

Yes

5. The course was well structured

	Number of Responses
1 Not at all	0 (0.0%)
2	0 (0.0%)
3	0 (0.0%)
4	2 (66.7%)
5 Completely	1 (33.3%)
Total	3 (100.0%)

6. The course prerequisites were sufficient to follow the course

	Number of Responses
1 Not at all	0 (0.0%)
2	0 (0.0%)
3	0 (0.0%)
4	1 (33.3%)
5 Completely	2 (66.7%)
Total	3 (100.0%)

Comments

Or maybe, probably. I don't think I strictly possessed some of the prerequisites and I had to struggle a bit with trying to understand all the weather related things, that I've either never encountered or had heard mentioned at a low level on a 1st year course once 5 years ago. It took a bit of extra time and effort but that is solely upon me.

7. The course material (literature, lecture notes, e-resources etc) helped me in my work with the students

	Number of Responses
1 Not at all	0 (0.0%)
2	0 (0.0%)
3	0 (0.0%)
4	2 (66.7%)
5 Completely	1 (33.3%)
Total	3 (100.0%)

Comments

The literature was not really needed. Abdel's lecture notes were far superior and much easier to follow than the book.

8. I could get support when I needed it

	Number of Responses
1 Not at all	0 (0.0%)
2	0 (0.0%)
3	0 (0.0%)
4	1 (33.3%)
5 Completely	2 (66.7%)
Total	3 (100.0%)

9. Were the lectures easy to follow? Were they instructive? You are welcome to comment on specific lectures or parts of the course.

Were the lectures easy to follow? Were they instructive? You are welcome to comment on specific lectures or parts of the course.

Yes, the notes on the course page was good to go back to.

Yes.

10. Were the home assignments useful?

Were the home assignments useful?

The exercises were sometimes useful! Not all were preparing us for the exam, I think. Would be good to have exercises that both are similar to the exam and gives understanding for concepts. The introduction questions were good, but some of them seems to need an update?

I didn't get much from the labs but the other exercises were good.

11. Other comments

Other comments

It was a shame that the wind lab could not be completed. The tour through the workshop was very interesting!

I had lots of fun during the course. I have acquired a knowledge base upon which I can build. The literature that I read is so much easier to follow now when I have this foundation. It was also a great opportunity to meet other open and helpful lecturers (e.g. John P., Leon C.) that I feel that I can go to and discuss my work with in the future.

Super happy!
